

COVID-19 08.13.2020 Correction

Hello everyone,

Last night, I incorrectly reported that we received test results back from G block at ISCC. The test results that came in yesterday actually came from individuals living in A and D blocks. This week at ISCC, we completed testing of A, D, F, and G blocks, along with a retest of small number of people from B block. I apologize for the error and any confusion that's caused.

I've had someone ask if housing units will return to secure status when positive results come in. The answer is that we're doing everything we can to prevent that and specifically, we have designated units where positive people can be grouped together and allowed to continue to have access to phones, recreation, etc. If, prior to testing however, people were living in housing areas that have restricted movements or were living alone, they *may* continue to reside in those areas after testing.

Thank you,
Bree
