COVID-19 RESPONSE PROCEDURES

CONTAIN
The patient will immediately be equipped with a medical mask and medically evaluated.

ALERT
At the same time, the shift commander will be alerted so movement is stopped to and from the area.

TEST
The patient will be tested using the ID NOW Rapid Test device. If negative, the patient will be isolated pending a follow up test by the state lab. If positive, the patient will be isolated until they are medically cleared.

QUARANTINE
People who were exposed to the patient will be quarantined and undergo medical screening twice a day. Staff will self-quarantine in their homes.

CLEAN
Cleaning teams will continue to disinfect common surfaces according to a documented schedule.
